

EmTech Expands its Operations

We are delighted to announce that EmTech has expanded its operations with a substantial investment in a new 55,000 ft² facility located in Sparkford, Somerset. This development, coupled with our new state-of-the-art machinery, will not only revolutionise our production and EHS processes, but marks a significant milestone in our company's growth and success.

Our new facility is also strategically located for easy access to major UK ports, enabling us to further streamline our export capabilities, resulting in faster delivery times to customers worldwide.

One of the key highlights of the new facility is the Training & Demonstration Area designed to showcase our innovative technology. We look forward to welcoming our customers and providing them with a unique opportunity to experience our products in action, whilst gaining a deeper understanding of their capabilities.

This exciting new chapter in EmTech's journey wouldn't be possible without the hard work of our dedicated team and the trust of our partners. We thank everyone for their support and look forward to our continued success and opportunities this new facility will provide.

If you have any questions or require further information, please contact our customer service team at sales@emtech-systems.com
