FIXED-RACK INCUBATION

Our **fixed-rack setter** designed for high productivity and simplicity of operation using our Eclipse™ control system. With advanced air circulation and interlocking panels to achieve excellent thermal uniformity.

**MATCHING FOOTPRINT
AS THE CHICK MASTER CLASSIC**

SETTER MODEL	CAPACITY		DIMENSIONS (mm)		
	54 tray	165 tray	Width	Depth	Height
SC576	93,312	95,040	3798	6604	3105
SC612	99,144	100,980	3798	6604	3215

HATCHER MODEL	CAPACITY		DIMENSIONS (mm)		
	54 tray	165 tray	Width	Depth	Height
PTH192	31,104	31,680	3440	2828	2844
PTH204	33,048	33,660	3440	2820	3000

- Capacity up to 100,980 eggs with 612 individual tray frames installed into the fixed-rack frame.
- Two zone control with eight fan assemblies and high capacity cooling coils.
- Each fan unit has a heating capacity of 1,200 watts and 9.6kW for the machine.
- Greatest multi-stage heat capture in the industry.
- Highly uniform turning operated by 12 individual 24VDC actuator systems.
- Fully insulated metal interlocking panel construction with airtight seal. Excellent thermal insulation and cabinet strength, using a PIR fire rated insulation core.
- Dual-use system capable of multi and single-stage operation, with upgrades available to improve performance and heating capacity.
- **EcoMist™** humidity system.
