

superclassicTM

DUAL PURPOSE FIXED-RACK INCUBATION

The most advanced fixed-rack setter on the market with increased performance and capacity, and a simplicity of operation using the Eclipse™ control. With advanced airflow and interlocking panels to achieve excellent thermal uniformity for the greatest heat capture in the industry. Lower your power consumption and improve your fixed-rack operation with the SuperClassic!

- Matches the same footprint as the standard Classic for simple replacement.
- High capacity with up to 100,980 eggs.
- Dual-zone control with six or eight fan assemblies and high capacity cooling coils.
- Each fan unit has a heating capacity of 1,200 watts (9.6kW for the entire machine).
- Highly uniform turning operated by up to 12 individual 24V DC actuators.
- Increased cabinet strength using interlocking PIR panels with a fire-rated insulation core.
- Dual purpose system capable of multi-stage or single-stage operation.
- EcoMist™ humidity spray system.

The fans, turning and cooling systems that are standard on the SuperClassic are available as separate upgrades to increase the performance and extend the life of existing (standard) Classics.

SETTER MODEL	SC306	SC408	SC612
