

# TurnPlus Upgrade

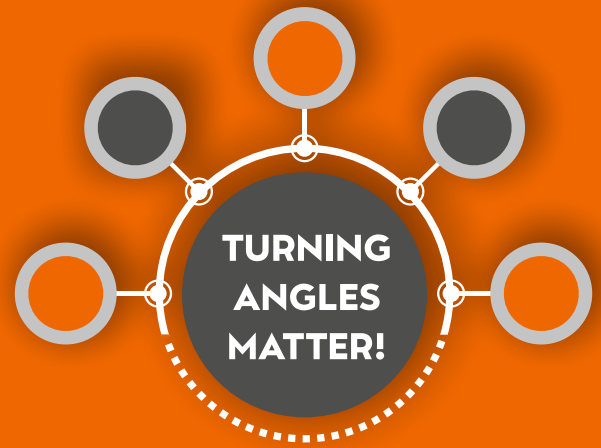

FOR CHICK MASTER CLASSICS

Distributed turning ensures uniformity, and assures the user that correct embryo agitation is taking place.

With the "TURN PLUS" your angles are consistent and correct from set to transfer, and prevents inconsistent airflow throughout the machine.

The simplest turning maintenance in multi-stage incubation. No more bent bars or changing tolerances.

The assembly comes complete with:

- 12 Actuators (with mounting plate)
- 12 Link bars
- 12 Driver turner bars
- 24 Idle turner bars
- All Fixings and Bearings required
